

PROFESSIONAL SOLUTIONS FOR WINE AGING AND SERVICE

- Energy-efficient wine storage cabinets
- Built-in and freestanding solutions
- Vibration-free winecellars
- Exactly adjustable temperature for wine ageing

WINECELLARS/WINE SERVICE CABINETS
WINES AT THE IDEAL TEMPERATURE

 **Dometic**

OPTIMAL STORAGE AND THE PERFECT TEMPERATURE – THANKS TO DOMETIC

We do our best. For your wine!

Wine connoisseurs, gourmets and gastronomes all agree: for wines to be able to develop to their full potential, both the storage conditions and the serving temperature have to be right. Ensuring this has been our job for decades. As a specialist for mobile refrigeration and air-conditioning solutions, we've developed a comprehensive product range devoted to solutions for storing wines. The elegant MaCave wine storage cabinets and winecellars from Dometic have proven themselves equally well in private homes and the specialty retail wine and gastronomy sectors. They satisfy the highest quality standards and are available in many sizes and models.

Wine service cabinets: perfect drinking temperature

Sommeliers and wine connoisseurs know that temperature plays a decisive role in the enjoyment of wine. White wines must be served at a much cooler temperature than red wines in order to give complete expression to the wine's bouquet and flavour. The perfectly equipped wine storage cabinets from Dometic offer one or two temperature zones for red and white wines. The desired (serving) temperature can be set here individually and thus adjusted to the type of wine, its vintage or personal preference. Favourite wines are ready to be served at any time – both in the modern household and in the gastronomy sector!

- Temperature range 5°C–22°C, individually adjustable
- LED interior lighting on/off selectable
- Slide-out shelves

Touch pad control panel with digital temperature display (fig.: S17G)

Winecellars: Optimal aging conditions

Quiet, dark, cool, high and stable humidity levels. No change whatsoever in the environment, no movement and absolutely no stress: it's exactly these conditions under which fine wines can rest and then blossom into full maturity. Based on this, someone who still owns an old vaulted cellar has the best of it when it comes to storing wine. But for everyone else the following holds true: the climatic conditions that prevail in a wine cellar can be recreated with the help of the right technology. And then moved to any desired location. MaCave winecellars from Dometic offer a complete range of solutions: They're "modern wine cellars" for well-insulated family homes, apartments, restaurants, offices and business premises.

- Vibration-free and noiseless operation
- Constant refrigeration without temperature fluctuations
- Optimal air circulation and air exchange within the cabinet

MaCave A25G (p. 19) MaCave A192G (p. 20) MaCave A192D (p. 21)

Control panel with digital temperature display (fig.: MaCave A25G)

Sturdy, slide-out storage shelves (fig.: MaCave A192D)

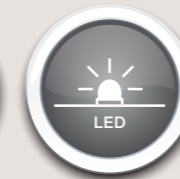

Locking door, 2 keys included in scope of delivery (fig.: MaCave A25G)

The tinted, insulated glass door provides optimal protection against UV rays and simultaneously offers a view of the valuable bottles of wine inside.

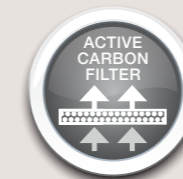

Light and heat? No, thanks!

It's no coincidence that wines are almost always filled in tinted glass bottles: wines are extremely sensitive to light. UV rays significantly influence the aging process of a wine. They lead to chemical reactions that result in a loss of aroma. Just a few weeks spent in a brightly lit room negatively impacts the taste as well as the bouquet of what was once a fine wine. Even more damaging than artificial light is direct sunlight, which also generates heat. The bottom line: wine needs a dark environment and maximum protection from UV light. Don't use heat-generating light sources – e.g., halogen lights – when wines are stored nearby. If you must use light, LED technology is best.

Dometic keeps out UV light

MaCave wine storage cabinets from Dometic are equipped with special doors made of highly insulating material that offers maximum protection from UV rays. The integrated LED lighting provides uniform illumination of the interior space – with the lowest levels of heat and completely free of damaging UV exposure.

Optimal air quality from Dometic

Dometic uses activated charcoal filters to remove and neutralise foreign odours from the ambient air. Constant ventilation is provided for in both the winecellars and also the wine cabinets made by Dometic (except MaCave S24G).

Clean, moist air for fine wines

When stored, wines need balanced, stable humidity levels. Values between 60 and 85 percent are considered ideal. If humidity levels are significantly lower, moisture evaporates through the cork. The cork dries out, becomes permeable and can no longer protect the wine from oxygen penetration. If humidity levels are too high, there is a danger that mould will form on the cork. If you want to store your wine for a longer period of time, be careful to provide an odourless environment and adequate ventilation. Gases and odours enter into the interior of a wine bottle through pores in the cork and can negatively impact the taste and bouquet of the wine.

WINE SERVICE CABINETS: WINES ARE ALWAYS READY TO BE SERVED

DOMETIC MaCave S24G

Perfect built-in for your wine supply

Dressed in noble silver and designed for permanent installation, the MaCave S24G is the jewel of every kitchen or kitchenette. The glass door gives a tantalizing glimpse of what's inside: 24 bottles of fine wine (fig. 1). The capacity can be expanded to 28 bottles by removing a storage shelf (fig. 2). Temperature control is very convenient using a touch pad: temperatures are freely selectable between 5°C and 22°C.

- Built-in solution for kitchenettes, etc.
- One temperature zone (adjustable from 5°C–22°C)
- Digital temperature display (°C/°F) with touch pad operation
- Interchangeable door hinges
- Glass door, UV impermeable
- Slide-out wooden shelves
- Blue LED interior lighting
- Dynamic cooling mode
- Humidity reservoir

Wine cabinets with compressor technology:
Powerful, economical and quiet

A well-heated restaurant, a sun-filled loft apartment, an open terrace door on summer days....Not a problem, because MaCave wine cabinets from Dometic are always the ideal place to store wine. Above all: the wine is at exactly the right temperature when it's served. Compressor technology provides excellent refrigeration performance, independent of high ambient temperatures and with low energy consumption. Wine cabinets from Dometic are perfect for storing red, white or sparkling wines that will be served and tasted in the short term. The desired drinking temperature is simply set and then constantly maintained. In some cabinet models, red and white wines can be stored separately in two temperature zones.

- Constant refrigeration performance, independent of the ambient temperature
- Temperature range 5°C–22°C, individually adjustable
- One or two temperature zone(s)
- Quiet and virtually vibration-free operation
- Low energy consumption
- Attractive design, perfectly equipped
- Ideal for short-term storage of table wines
- LED interior lighting on/off selectable

DOMETIC MaCave S17G

Your favourite wines within easy reach

Thin, compact, perfectly designed: there's always a spot for the MaCave S17G. Whether integrated into a kitchenette or used in a freestanding role, this compact compressor-powered device stores 17 bottles of wine (standard version, Fig. 1) and up to 23 bottles (Fig. 2) with accessories. Red and white wines are stored under optimal conditions in two separate temperature zones and can be served table-ready at any time.

- Two temperature zones (adjustable from 5°C–22°C)
- Digital temperature display (°C/°F) with touch pad operation
- Height-adjustable feet (up to 70 mm)
- Interchangeable door hinges
- Blue LED interior lighting
- Locking glass door, UV impermeable
- Activated carbon filter and humidity reservoir for an optimal internal environment
- Decorative foil overlay (removable) included
- Temperature-compensating mode for winter operation
- Dynamic cooling mode

DOMETIC MaCave S118G

The elegant wine promoter

Service at its best: red and white wines can be removed and served table-ready from the MaCave S118G. Wines are stored in two separate temperature zones that can be individually adjusted to the ideal drinking temperature of the respective vintage. The standard version of this elegant compressor-powered unit has room for 118 bottles; accessories (storage racks) can expand the capacity to as many as 198 bottles. Use as a permanent built-in or freestanding unit.

- Use as a built-in solution or freestanding unit
- Two temperature zones (adjustable from 5°C–22°C)
- Digital temperature display (°C/°F) with touch pad operation
- Interchangeable door hinges
- Blue LED interior lighting
- Locking glass door, UV impermeable
- Activated carbon filter and humidity reservoir for an optimal internal environment
- Decorative foil overlay (removable) included
- Temperature-compensating mode for winter operation
- Dynamic cooling mode

DOMETIC MaCave ST198D

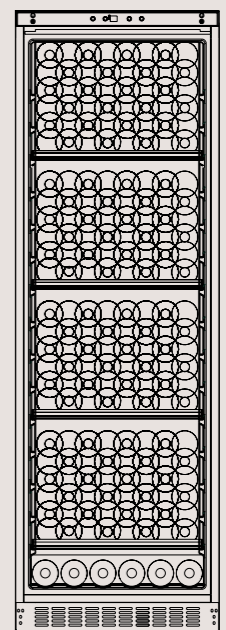

Big capacity at a small price

A cost-effective solution for storing larger quantities of wine: the MaCave ST198D is used primarily in the gastronomy sector, where it can keep up to 198 bottles of wine at the right temperature. The elegant, black compressor-powered unit offers a single temperature zone and stands out with its low energy consumption. It easily integrates in a kitchenette or other furnishings, but is also an “eye-catcher” as a freestanding unit.

- Use as a built-in solution or freestanding unit
- One temperature zone (adjustable from 5°C–22°C)
- Digital temperature display (°C/°F) with touch pad operation
- Lockable, interchangeable door hinges
- Activated carbon filter for an optimal internal environment
- Blue LED interior lighting
- Elegant design, solid door
- Ideal for the gastronomy sector and storing wine
- Temperature-compensating mode for winter operation
- Dynamic cooling mode

**WINECELLARS:
VIBRATION-FREE WINE STORAGE**

Winecellars with absorption technology: Vibration-free and absolutely noiseless

Dometic is a pioneer and leading supplier of absorption technology. Tens of millions of refrigerators and mini-bars are in service worldwide. As the only refrigeration technology that operates vibration-free and completely without noise, absorption technology is perfect for the long-term and mid-term storage of wines. The high-quality MaCave winecellars from Dometic perfectly imitate the advantages of a natural wine cellar: vibration-free storage, constant temperatures at all times of the year, adaptive humidity levels of 60 – 85 percent, protection from UV rays and adequate air circulation.

- Vibration-free and noiseless operation
- Constant refrigeration without temperature fluctuations
- Temperature range 8°C–18°C, individually adjustable
- Optimal air circulation and air exchange within the cabinet
- Robust and durable technology, free of moving parts
- Attractive design, perfectly equipped
- Ideal for long- and mid-term storage of wines

DOMETIC MACAVE A25G

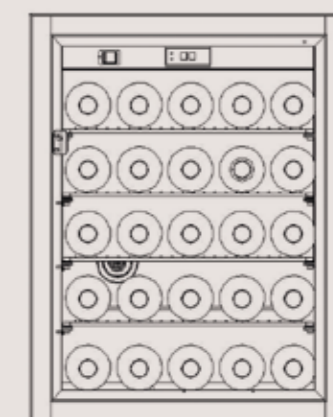

Wine storage in the smallest of spaces

Ideal for a townhouse, holiday home or apartment: wherever space is at a premium, the MaCave A25G serves as a small, compact “wine cellar”. The conditions inside this cellar are optimal for storing fine wines: constant temperature and humidity, absolutely vibration-free. It’s all possible because of Dometic’s sophisticated absorption technology. The standard capacity of the perfectly styled device is 25 bottles.

- Elegant, freestanding model
- Absolutely silent operation
- One temperature zone (adjustable from 8°C–18°C)
- Digital temperature display (°C/°F) and electronic thermostat
- Locking glass door, UV impermeable
- 5 storage compartments
- Activated carbon filter for an optimal internal environment

DOMETIC MaCave A192G

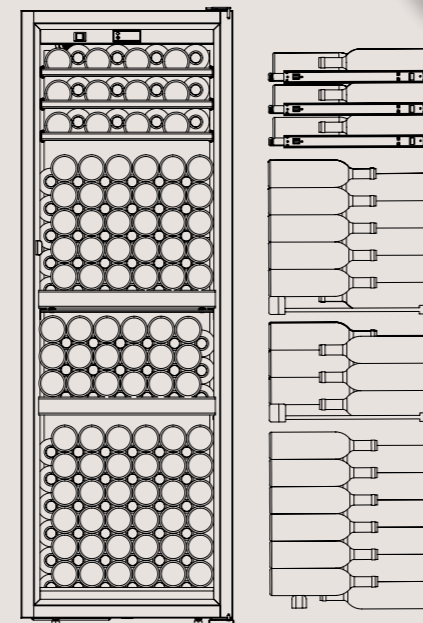

The modern winecellar

What to do if you're passionate about collecting fine wine, but don't have access to a traditional wine cellar? Entrust your precious wine to the MaCave A192G! This absolutely quiet and vibration free winecellar uses absorption technology to provide optimal climatic conditions: red and white wines can mature under perfect conditions. The winecellar holds up to 192 bottles and offers an elegant design that's a perfect match for modern interiors.

- Elegant, freestanding model
- Absolutely silent operation
- One temperature zone (adjustable from 8°C–18°C)
- Digital temperature display (°C/°F) and electronic thermostat
- Locking glass door, UV impermeable
- 6 Storage compartments, including 3 slide-out shelves

DOMETIC MaCave A192D

High-tech behind cherry wood

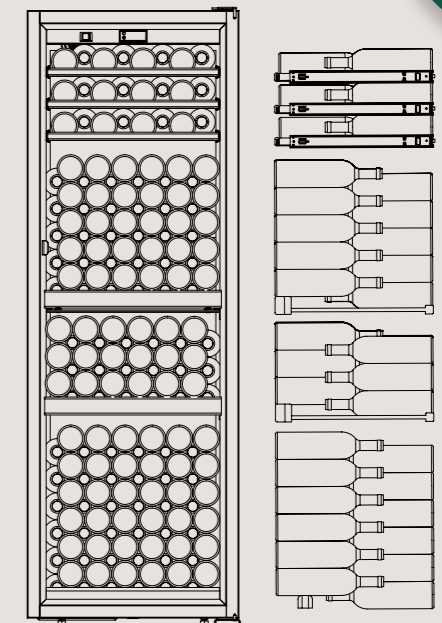

The same functionality as a traditional wine cellar, but much more practical: the spacious MaCave A192D holds up to 192 bottles of wine under lock and key. Proven absorption technology ensures that fine wines can rest and mature in a vibration-free environment under optimal temperature conditions. This stylish winecellar also delights the eye: warm cherry wood is matched to a black metal frame.

- Elegant, freestanding model
- Absolutely quiet operation
- One temperature zone (adjustable from 8°C–18°C)
- Digital temperature display (°C/°F) and electronic thermostat
- Locking wood door, wood décor
- 6 storage compartments, including 3 slide-out shelves
